

## DUANE AND NORMA ANDREW REACH COORDINATOR!

"I am really excited, I have been working towards this goal from the day I started!" says Duane Andrew. Duane says there were many times when he was frustrated with his lack of success in the industry but with his hard work and his philosophy of **not quitting before pay day**, he has reached his goal!

Duane has been involved with the network marketing industry for over 30 years and Bi-Tron is one of the most successful companies he has been with. Previously he was involved with another company which competed with Bi-Tron's products. At one point, someone offered him a cross axis machine which he used to test the companies product with Bi-tron's. Duane states, **"when we tested it, it could not compete with Bi-tron."**

Besides the excellent product, he believes the **leadership at Bi-Tron has raised** the bar by providing excellent infrastructure and training. He says the website tools are the best he has ever been exposed to in 30 years. "Being able to view all the video's, audio tapes, slide shows, and company info in a heart beat is such an amazing asset to the business." Duane explains that when anyone interested phones or visits him, he goes to the computer right then and he shows them a presentation, **no lag time at all!**

Bi-Tron Today is live every Tuesday at 12:00 pm and Duane reveals he always either watches the presentation live at noon or watches the archive of the show when he gets home in the evening. He notes he also always attends the weekly training sessions **"You get inspiration from watching the personal growth of others.** When your down you need the meeting, when your up the meeting needs you."

Duane and Norma Andrew, Kelowna, BC

Duane continues to teach and practice the importance of following up, setting specific goals, plugging into the Bi-Tron system, attending all weekly trainings, all day trainings, and attending the Bi-Tron Conferences.

Duane also shares that one of the best tools in the industry is the book titled **'Being the best you can be in MLM' by John Kalench.** "Anyone exposed to this industry should read this book. Its like the first school book for anyone in the industry." Another strategy that has led to his success is the **'drip system.'** Duane explains that he consistently drips information on people through emails and phone calls letting them know he and the opportunity are still available. He also does not hesitate to call people he has not talked to in four to five years.

Duane shares that his business has flourished from attending the Bi-Tron Conferences. **"Going to the Penticton and Vancouver leadership schools has made a big difference for my business and changed my approach to network marketing"**, he says. After each leadership school his business grows. The leadership school brings him a new brand of enthusiasm and believability. "If others can and are doing it so well, the only reason I'm not is because I'm not doing as much as them," he adds.

Duane says he is with Bi-Tron for the long haul. There are so many good people involved with Bi-Tron and he can't imagine anyone quitting from such a great opportunity. **"There is no better program that has ever been in the pipes," he says.**

Duane believes Bi-Tron's management is the key to its success. "What a pleasure they are to deal with," he adds. **He is looking forward to seeing everyone at the next Conference in Kelowna !**

**Congratulations Again Duane!**

## Your Bi-Tron Successes

I want to share my Bi-Tron experience with you. In my 1988 Ford F350 crewcab 4X4, I had **phenomenal results!** The most note worthy was that my transfer case was vibrating to the point of being able to feel it in the seat and floor boards and you couldn't have a conversation with out shouting. The transmission shop told me I would need to rebuild it at a cost of \$800 - \$1500! Well, a \$20 bottle of **Power Train & Gear Formula** and approximately 150 kms later, no more noise and vibration. **It was like new!** This was done in early Dec 2003 and no problem till present!

I have retired this vehicle and replaced it with a 2000 Ford F350 Super duty crewcab 4X4 and I had no hesitation in purchasing this truck with a V10 gas tank! Before adding Bi-Tron, on 108 litres of fuel I got 444kms around town. After adding Bi-Tron every where possible with my first tank of fuel around town I got the following results; 110 litres of fuel I got 581 kms! **that's a 137 kms improvement after the first tank full!!**

### YOU NEED BI-TRON IN YOUR VEHICLE!

Jeff Bandick, Mission B.C.

My name is Pierre Chouinard, I am a new distributor from St.Pierre Manitoba. I attended Chuck's conference in Winnipeg and was very impressed with his presentation and his integrity. **The first time I used the products, I gained 75 km more** and 95 km the second time around. I do a lot of traveling and drive a 97Dodge Caravan with 298,000 km. Prior to trying the products, I had a lifter that was starting to make noise and the van was

starting to idle very rough to the point it would stall on me as I was making a turn. **Not only did I save on fuel, it almost eliminated the noise of the lifter!** Now the van idles extremely smooth, I was having to replace the carburetor but there is no need for it with Bi-Tron. As well I noticed the transmission is shifting extremely smooth when I use Bi-Tron. **Thank you Bi-Tron and I look forward on becoming an excellent team player.**

Pierre Chouinard, St.Pierre MB

## REGISTER FOR KELOWNA June 24 -26th

Make sure as many of your team attend as possible—The most legs in attendance goes with their partner for **FREE**. Take advantage of our great corporate rate at the **Grand Hotel** call 1(800) 465 4651 and the Special Conference pricing.

Register online or call 1(866) 824 8878.

Don't miss out on our **Whale Watching** tour of the Gulf Islands on Saturday June 18th. Enter to win by registering every retail sale

online and/or by participating in our BV contest. See your back office for details and for streaming video highlights!

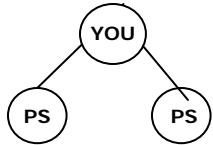

## GET A TAGLINE NOW!

With no contract or sign up fee and as little as **\$19.95** a month Bi-Tron's Tagline Unified messaging service is proving to be the ultimate communications tool. Distributors are able to trade success stories and keep their organizations up to date with all the latest Bi-Tron news! Get with the program try it today! **Call 1-866-824-8185**

## Great Bi-Tron Experience!

My name is Riemer Faber, **I am an avid hot rodder and amateur mechanic.** I have always been a bit of a skeptic especially when it comes to "snake oil" products for cars. I have had an interest in Bi-Tron since I heard about it through guys at work. I was hesitant to try it out in my vehicle. Then I watched some of the internet videos and slowly came around to thinking that this might actually do what It claims to do! I have a fairly good grasp on chemistry as that was my major all through high school and some of college, so I understand what Bi-Tron claims to do, and after the other day I can say I know what Bi-Tron claims to do and that the claim is true. **Bi-Tron actually does what It says it is supposed to do!**

We were taking the kids to Manning Park the other day in my wife's Jeep Grand Cherokee. It has a 4.0l inline six, and about 320000 km on it. It has been running fairly well getting average mileage and having about as much power as can be expected for a vehicle of this size and weight. Recently, I had done some mechanic work for Jeff and he gave me some Bi-Tron to try in my own vehicle. Since we put more miles on my wife's Jeep, I put the Bi-Tron in the jeep. Well thats the lead in to the story, **the rest will blow your mind, as a part time mechanic it left me speechless.**

Our trip started in Aldergrove BC. The weather was warm and sunny. We drove east towards Manning Park. We were in a bit of a rush so I was driving slightly higher than posted speeds and perhaps not driving with fuel economy in mind. We had just crested the "Hope Slide Hill" heading east. It is a long and steep hill. Apparently, my wife's jeep had developed an oil leak or perhaps burned a 'bit' of oil in the past month. **I had not had a chance to check the oil or do any maintenance other than add Bi-Tron** and make sure the oil was topped up at that time (about three weeks ago.) Since I usually always monitor the gauges when driving I noticed that the oil gauge was fluctuating quite a bit during the drive, as we came to the top of the hill it was fully on 0 psi for pressure. We coasted past the crest and in neutral till we could turn off the road onto a level spot, my oil gauge still reading 0 psi,

and temperature reading normal!

I popped the hood fearing the worst, but there was no characteristic "my engine is WAY to hot smell." I thought perhaps the gauge had malfunctioned. That was until I pulled out the dipstick. BONE DRY, not even a drop on the tip. I thought I was in trouble and a cold sweat broke and I felt a huge knot in my stomach telling me that this was not normal and I was going to be in BIG trouble! **With my 9 month pregnant wife in the truck and two boys wanting to get going, I calmly said "hmm that's odd."** I closed the hood and we proceeded to drive another 40 km through the mountains' till Manning Park, where I purchased 4L of oil and slowly added them to the crank case. It took a little over two liters before the oil even registered on the dipstick.

**I had driven 40 kilometers in the mountains with absolutely NO OIL in the crankcase.**

The only thing preventing my engine from welding itself together was the **Bi-Tron that had worked itself into the metal.** With 4 fresh liters of oil in the jeep we drove back the 140 km trip back home. All the while I was wondering why didn't the engine seize on the hill? After the Manning park incident I did have an opportunity to examine the valve train of the jeep's 4.0l to see if there was anything damaged by the recent events. Nothing out of the ordinary (for 320 000km). The valve train looked fine. No burnt oil anywhere just some normal mild discoloring in the valve seals (which are plastic, Bi-Tron doesn't make anything for plastics yet do they?) **The engine runs well, there are no knocks or noises and it still has all the compression it did when we purchased it many years ago.**

While I am not much into the business of selling, I do have the opportunity to talk with people about the product and without fail I can tell people that I will definitely be one of Jeff's best promoters and customers! **Bi-Tron does what it says it does, plain and simple!** And it saved me and my engine, I plan to rebuild this motor later this summer, and **I will be using Bi-Tron products again. MOST DEFINITELY.**

**Thank you for your time, and the Bi-Tron!**

## FIELD BUSINESS MEETINGS AND TRAININGS

### WEEKLY MEDIA EVENTS

#### MONDAYS

Live Leadership **Conference Call 7:00 p.m. (P.S.T)**  
To attend these live and exciting calls call:  
**1-212-990-8000** and enter the pin number **1524#**
