## Natureworks product line

*EcoLogo Certified, biodegradable, non toxic in concentrate and capable of replacing all the chemical toxic cleaners in your home & office.*

**Natureworks isn't only about cleaning up your home; it's about a better, smarter, way to clean.**

Cleaning can be a chore, but dangerous chemicals and toxins can make it dangerous and a long term health concern. Stinging eyes, burning lungs and headaches are warning signs, not the unfortunate side-effects of a clean home. That's your body telling you, "Stop using this. It is bad for you!" What's even worse is that you are putting your family at risk as well. That's why Natureworks' entire product line is both people and pet friendly, specially formulated to quickly clean up messes without harming you or your loved ones.

You may not know it, but if you're using typical household cleaners or you are likely using dangerous chemicals. Chemicals that aren't just bad for your home and the environment, but incredibly bad for you and your family as well.

What can you do? **You can change!** Take a look at the way you're cleaning, and see that unforgiving chemicals and toxins have no place in your home, no place in your body and no place in your cleaning products.

**Do You Have the Abundance Mentality Mindset!**

Natureworks is the simple, natural, answer! Our line of home care products are non-toxic, made with naturally derived, biodegradable ingredients that clean like commercial grade cleaners without the toxic downside.

The way we look at it, if your home is chemical free, we all benefit. There's no question as to the advantages of using all natural, environmentally friendly cleaning products and you have selected the best of the best, Natureworks.

Natureworks cleaning products are proudly made in Canada and are Environment Canada EcoLogo certified meeting stringent environmental regulations. When you see the word "natural" on a Natureworks label, it means that 100% of its functional cleaning ingredients – things like soaps, detergents, solvents and enzymes – are either found in nature or derived from natural sources.

We use natural and naturally derived materials from renewable or abundant sources wherever we can. If we can't find a natural ingredient to get the job done, we'll use a safe, green, man-made version instead. In all cases, we only use ingredients that have passed through a comprehensive green and health screen: ingredients we have confirmed to be totally safe for people and safe for the environment. This is why we were certified by one of the most recognizable "green" certifications in the world, EcoLogo.

When it comes to labelling our products, we hold ourselves to a high standard because we believe that a natural cleaner should actually come from nature.

About **Naturefx Skin-  
care & Haircare**

Natureline Solutions has been exploring how to reverse the effects to our bodies of the harsh chemicals we expose ourselves to every day. Exposure to toxins in the environment has lead to such things as chemical sensitivities and premature appearance of aging in addition to numerous health issues.

What is apparent is that many of the products on the market purporting to help in this area were themselves contributing to the problem! Expensive products that were cheaply made with poor quality, harsh ingredients and hazardous cheap bulking agents.

This research lead Natureline to every corner of the globe and eventually we found naturally derived (botanically based) anti aging and hair care solutions developed from the deepest recesses of the African subcontinent. Working with world renowned pharmacists and master product formulators, the father and son team of Lou and Darryl Segal, we developed the NatureFx line of anti aging skin and hair care.

Natureline has been privileged to participate in this final chapter in a remarkable story that all started some four decades ago with Lou Segal uncovering the remarkable properties of the East African Rooibos bush and its almost miraculous restorative antioxidant properties from the indigenous tribal moon rituals of a small and isolated tribe deep in the jungles of Africa. Together with his son Daryl, they combined the secret family extraction processes, formulas and blending techniques with the very latest technological advancements in delivery mechanisms and naturally derived technologies in order to continually improve and enhance their secret formulas to minimize the appearance of wrinkles and maximize the health and appearance of thinning damaged hair in men and women.

Today the Segals proudly partner up with Natureline Solutions to bring the wonders of their amazing discovery to as many people as possible around the world with the exclusive NatureFX formulas.

After years of research Master Formulator and Pharmacist Darryl Segal, author of "Preventing & Reversing Hair Loss" has developed a new "bio-natural compound" by using botanical nutrients. The results have been so dramatic in restoring vibrant, full and healthy looking hair for men and women, that he is able to guarantee maximum benefits.

Rooibos has now been documented by independent studies showing significant improvement in hair growth. Pharmacist Darryl Segal incorporated this unique South African herb with the latest in hair care technology:

African Pygeum

Biotin

Nettle

Rosemary

Saw Palmetto

**Do You Have the Abundance Mentality Mindset!**

Panthenol  
Niacin  
Inositol  
Aloe Vera  
Hemp Seed Oil  
Ginkgo Biloba  
Green Tea  
CoQ10  
Shea Butter  
Alpha Lipoic Acid  
Cayenne Pepper

You will notice a visible difference\*

Studies done on users of a Rooibos Hair Lotion showed the following results:

- 67% noticed a reduction in hair loss
- 78% saw a dramatic improvement in hair quality & thickness
- 45% saw low to medium re-growth of their hair

\*Independent studies after 90 days of use. Results will vary.

Hair is important to both men and women. As a society, we annually spend billions of dollars on hair styling, hair coloring, as well as shampooing and conditioning products to get that desired look.

Some of us, when experiencing thinning hair or hair loss, even go as far as to attempt painful implants or other surgical procedures to combat our problem. Others, not wanting to think of surgery as an option, use harmful chemicals on their scalp to no great success and to possible harmful side effects. There are, however, several natural alternatives that are neither painful nor harmful.

The good news is that there are preventative measures that can be taken to avoid the serious problems of baldness, hair loss and something as simple as unhealthy looking damaged hair. By utilizing NatureFX hair care products you will create the ideal environment for healthy hair growth. With patience and daily care, you will have thicker, stronger and healthier looking hair.

## Think about this: another use for the Bitron PEN LUB

### DO YOU HAVE CLOGGED DRAINS IN YOUR KITCHEN SINK OR BATHROOM OR LAUNDRY ROOM

You May or May not have clogged drains in kitchen or bathroom. They May or May not have metal connections for draining. If they do then you may wish to try this with some Bitron Penetrating Lubricant. You May also have to apply it a couple of time. In our bathroom sink and tube the water was not draining very well so I applied a few applications of the Bitron PEN LUB to the metal ring so that the metal surface gets covered with the bitron. Since the bitron sticks to the metal as its prime action, once that happens and the crap get forced off the metal, I am finding that the water now drains much better in the bathtub rather than builds up before draining. The bathroom sink is a little slower in getting cleaned out but the draining here is likewise improving. In each case what I have done is pour the bitron PEN LUB on the metal, the top ring in both the bathroom tube and sink.

This way very little of the PEN LUB will get carried off by the water to do any extra polluting. Alex W Fraser 10/09
